PROFESSIONAL EXPERIENCE

Strategic and data-driven Digital Performance Manager with 6+ years of experience transforming data into actionable brand and marketing strategies. Proven record of leveraging multi-source analytics (digital, media, and consumer data) to deliver compelling insights, drive category growth, and influence executive decisions. Expert in storytelling through data, AI insights, leading cross-functional collaboration, and building measurement frameworks that improve marketing effectiveness and business impact. Leading with a consumer-center, insights-led culture that bridges strategy with execution.

Cox Media Group | Atlanta, Georgia

12/2021 – current

Business Financial Analyst > Digital Business Analytics Manager – Reporting to VP of Digital Operation

- Lead & serve as a strategic analytics advisor supporting enterprise-scale digital performance initiatives across 20+ markets, partnering with marketing, finance, sales, and technology leaders.
- Developed executive-level brand and performance dashboards (Power BI, DOMO, NinjaCat), integrating multiple data streams to highlight key opportunities and growth levers. Lead digital performance measurement and optimization for multi-channel marketings, including paid search, social, programmatic, OTT.
- Partnered with Marketing, Sales, and Finance to define benchmarking, KPI frameworks for campaign ROI, category share, and lead quality, guiding investment and product positioning decisions.
- Directed cross-functional analytics projects to track advertising performance, and customer behavior patterns across digital and offline channel, resulting in \$1.5M+ annual cost savings.
- Produced monthly Business Review Reports and Insight Decks synthesizing complex data into clear visual stories for senior leadership and regional Digital Media Directors.
- Managed governance of consumer and campaign data from 20+ platforms (Meta, GAM, CM360, DV360, Amazon), ensuring consistency and accuracy across reports. Mentor analytics team members, training on data storytelling, visualization, and performance optimization best practices.
- Partner with AI and data science teams to design and deploy LLM-powered analytics agents that enhance productivity and reduce 100+ hours/month of manual analysis.

Universal Processing | Atlanta, Georgia

2/2020 – 11/2021
